

Managing Operational Street Lighting PFI Contracts

Course Outline

Who is this course designed for?

This course is for people who have either recently moved into an operational role on a street lighting PFI contract, or who are currently managing an operational contract and would like to have a more in depth look at the key aspects of contract management. It is also targeted at teams responsible for ensuring the contract is delivering the benefits and value which were identified at the start of the Project.

This course is appropriate for people from local government or the private sector.

Why should I attend?

Delegates will become clearer about their roles within the contract management team as they explore the areas of their contract which are key to its successful delivery.

Delegates will be able to discuss key aspects of their contract and supplier relationships over the course relating to street lighting PFI contracts.

They will gain new insights and get a better understanding of issues such as monitoring, contract variations, relationships, energy consumption, payments etc.

Summary of the Course

This course is designed to touch upon all of the key aspects of operational street lighting PFI contracts which both new and experienced managers should be aware of, from monitoring to validating the monthly payments.

Looking at areas such as contract variations and monitoring, delegates will gain a greater depth of knowledge which they can take back with them to the workplace. New knowledge will allow delegates to confidently work with their suppliers to manage with more efficiency.

Patrick Waterhouse

Patrick has worked on PFI projects since 1995 and currently manages three street lighting PFI projects on behalf of their private sector investors. In addition he has advised contractors on two further street lighting and highways management PFI projects.

His PFI experience also extends to health, justice and regeneration projects.

Patrick is a chartered engineer and has strong skills in contract management and dispute resolution.

Anthony Garnett

Anthony has over 25 years business experience in procurement, outsourcing, and contract management. At PwC Management Consultancy he managed and developed the PPP / PFI training programme for several clients.

Anthony specialises in developing and delivering effective training programmes for his clients which impact on the bottom line.

Key areas covered on the course

- Understand the contract management role and what you are trying to achieve
- Using the output specification and performance standards to deliver a quality service to the public
- Ensuring that the payment mechanism is used correctly and that deductions are made when justified by performance
- How to manage changes and variations using the project agreement's provisions
- Ensuring that the Contractor completes all of his reporting obligations and why these are important
- Allow delegates to cement the learning process throughout by engaging them with practical exercises
- Ensure that the energy consumption risks are understood and that the costs adjustment is properly calculated

Who will run this course and what is their experience?

We always ensure that the team taking the course(s) have an appropriate background in the that they are covering.

Patrick has 10 years' experience of managing and supporting 5 street lighting PFI contracts and has a wealth of experience in other PFI areas dating back to 1995 and the launch of the PFI.

Our tutors will always keep the content interesting and encourage active participation.
